The five annexes that follow are working tools. A reader opens them while a chapter is being read, when a date, a statutory reference, a case citation or a regulator document needs its context. None of them replaces the discussion in the parts of the book, where the reasoning, the practical consequences and the opposing views are set out. Where an annex entry and a chapter differ, the chapter governs, because it was written with the source open while the annex compresses the same material into a line.

The chronology in this first annex runs from the Bitcoin white paper of October 2008 to the state of the law on 30 June 2026. Swiss, Singapore and international events stand side by side so that the reader can see how each hub responded to the same market shock or the same global standard.

The table of legislation gives Fedlex SR numbers for Swiss acts and ordinances and Singapore Statutes Online short titles for Singapore statutes, together with the provisions that matter most for digital assets. The table of cases lists the decisions cited in the book with a one-line proposition for each of them. The table of regulator guidance collects FINMA, MAS, FTA, IRAS and SECO documents by identifier and date. The final annex describes the author and explains how the practice works with clients.
